A Unique Program

CPESC Registrants must understand the minimum requirements for the US EPA National Pollutant Discharge Elimination System (NPDES) permit program and/or Canada's Department of Fisheries and Oceans Requirements, as it relates to construction-site Erosion and Sediment Control.

Registrants must demonstrate proficiencies in Site Planning and Management, Erosion Prediction, Runoff Management, Soil Stabilization, Erosion Control, and Sediment Control.

Certified Professional In Erosion and Sediment Control

Certification Program

■ The Certified Professional in Erosion and Sediment Control program was created over 25 years ago to provide professional credentials to individuals working on construction-site erosion and sediment control issues. This program now has active registrants in over 15 countries around the world. CPESC certification is being required by numerous local governments, state governments, provinces and is recognized in several state Construction General Permits.

Who Can Apply?

The program is available to all qualified individuals who wish to demonstrate their proficiencies in construction erosion and sedimentation control skills.

Candidate Qualifications

Candidates must have at least seven (7) years of directly related experience and possess a high school diploma (or equivalent) along with work references. Individuals having a degree may receive up to four (4) years credit for their education. Individuals having at least two (2) years of qualifying education and/or work experience may qualify for In-Training status.

How To Apply

Applications may be downloaded from www.cpesec.org or obtained by contacting:

CPESC, Inc.
49 State Street
Marion, NC 28752-4020
828.655.1600 phone
828.655.1622 fax
info@cpesc.org email

Candidates must submit their application along with a required fee. Following application review and approval, they must complete a written examination to demonstrate their knowledge of basic skills in erosion, sediment and storm water related construction projects.

Detailed Information

Detailed information about program requirements and procedures can be found at the CPESC program web site: www.cpesec.org

Mission Statement

The public demands evidence of professional competence from persons whose activities affect the physical and economical well being of people throughout the world. Such professionals increasingly must be able to show evidence of their qualifications. CPESC, Inc. issues certification to individuals based upon thorough examination and review of such person's educational, scientific and service knowledge, training, experience and activities in both the public and private sector. CPESC, Inc. has developed standards and procedures for certifying persons who are qualified to practice in the fields of erosion and sediment control and seeks to promote the common business interests of persons who are so certified.

Additional Provisions

Registrants must subscribe to a Code of Conduct and Ethics, pay an annual renewal fee and provide proof of continuing education credits. Individuals interested in certification should check with the appropriate regulatory authorities to determine acceptance of this certification. **Note that certification is not a substitute for any required professional license.**

A Proven Industry Standard

CPESCs are recognized around the world as individuals who have demonstrated the minimum proficiencies needed to design and evaluate management methods used to control erosion and sedimentation on land-disturbing activities. Specific state requirements may be added to the certification process.

EnviroCert International, Inc.

EnviroCert International, Inc. is recognized internationally as a certification body for professionals in the erosion and sediment control, and storm water industries. With over 25 years of certification experience, EnviroCert International, Inc. takes pride in offering the CPESC program.

Other EnviroCert International, Inc. certification programs include the Certified Professional in Storm Water Quality™ (CPSWQ®) and the Certified Erosion Sediment and Storm Water Inspector™ (CESSWI™).
