Work Duties	Hazards	Recommendations
Using hand tools	Cuts, pinches, smashes, punctures, severing of fingers.	Keep tools in good condition. Inspect tools before use. Wear safety glasses. Work away from yourself. Use normal caution required for all hand tools.
Installing ceramic tile	Cuts from installing ceramics. Inhalation of fine particles of materials from cutting tile.	Wear proper PPE such as leather gloves, dust mask and safety goggles at all times. Dispose of broken properly so no one else is injured.
Working with power tools, drills, saws, etc	Cuts, abrasive, electric shock, injury from flying debris, tripping over power cords	Keep tools in good condition.
Heavy lifting	Use proper lifting techniques, limit duration of repetitive motion.	Always know your weight limit, lift with your legs, get help if needed.
Mixing cement.	Irritation to skin from contact with cement.	Wear safety glasses and, as necessary, gloves, long-sleeve shirt and/or coveralls to minimize contact with skin. If cement does get on skin, wash affected area immediately. Apply moisturizing lotion to any irritated skin.

Mason

Work Duties	Hazards	Recommendations
Mixing plaster	Inhalation of fumes	Work in a well-ventilated area or outside
Using scaffolding	Scaffolding collapsing, slipping/falling from scaffolding	Inspect all equipment before using and make sure it is assembled correctly and all wheels are locked. Use safety rails and a safe way down
Using ladders or step-ladders	Ladder collapsing; Slipping and falling from ladder	Inspect ladder before use. Use ladder at proper height. Make sure the ladder is assembled, locked and on level ground. Do not exceed weight limit for ladder. Do not stand on the top or top rung of ladder and make sure a co-worker is holding ladder if any higher than a step-ladder.
Operates University vehicles	Motor vehicle accident, striking a pedestrian or bicyclists.	Inspect vehicle before use. Use seat belts and safety prescription glasses. Stay alert for pedestrians, other vehicles and objects in path.
May work with materials containing asbestos.	Could cause possible health issues if inhaled or ingested	Never disturb materials containing asbestos unless properly trained. Always use appropriate exposure control methods and wear designated PPE.
